

ASHUTOSH MOHANTY

B.Tech Computer Science & Engineering (AI & ML) • 2nd Year

Gunupur, Odisha, India | ashumohanty678@gmail.com
[linkedin.com/in/ashutosh-mohanty-892867385](https://www.linkedin.com/in/ashutosh-mohanty-892867385)

PROFESSIONAL SUMMARY

Driven, adaptable, and receptive 2nd-year B.Tech student in Computer Science & Engineering (AI & ML) at GIET University. Gained hands-on industrial exposure during a 30-day summer internship at Hindustan Aeronautics Limited (HAL), Engine Division, Koraput, focusing on aerospace Cabpath Network architectures. Possesses a strong continuous learning mindset, solid foundations in Python, C, and SQL, and eager to contribute effectively as a software development intern.

TECHNICAL & SOFT SKILLS

Programming:	Python, C, SQL
Core Competencies:	Data Structures & Algorithms, Database Management Systems (RDBMS), AI & ML Fundamentals
Developer Tools:	Git, GitHub, Visual Studio Code, Linux / CLI Basics, MySQL
Soft Skills:	Adaptability, Receptive, Analytical Problem-Solving, Collaborative Teamwork, Technical Documentation

INDUSTRIAL INTERNSHIP

Hindustan Aeronautics Limited (HAL) — Engine Division

15 Jun 2026 – 14 Jul 2026

Summer Vocational Intern (VT No: 26-162) • Study on “Cabpath Network”

Koraput, Odisha

- Completed a **30-day vocational training internship** (June 15 – July 14, 2026) at HAL Engine Division, Koraput, receiving a “**GOOD**” performance rating (Certificate No: HAL/KPT/KT/MDP-04/2026/61).
- Carried out a comprehensive technical study on “**Cabpath Network**”, examining aerospace cable routing, network architecture, and wiring harness integrity for aero-engines.
- Studied industrial software protocols, hardware-software integration standards, and fault-tolerant communication pipelines employed in defense aviation manufacturing.
- Interacted with senior technical officers at the Training & Development Institute (T&DI), gaining practical insights into aviation safety, quality assurance, and mission-critical systems reliability.

EDUCATION

GIET University

August 2025 – August 2029

Bachelor of Technology (B.Tech) — Computer Science & Engineering (AI & ML)

Gunupur, Odisha

- Current Standing:** 2nd Year Undergraduate • Specialization in Artificial Intelligence and Machine Learning.
- Relevant Coursework:** Programming in C, Python for Data Science, Database Management Systems (SQL), Data Structures & Algorithms, Discrete Mathematics.

KEY PROJECTS

Database-Driven Information & Management System

Python | SQL

- Architected a relational database schema in SQL with primary and foreign key constraints to ensure data integrity and ACID compliance.
- Developed modular Python scripts to perform parameterized CRUD operations, input sanitization, and data verification.
- Constructed optimized SQL queries and indexing strategies to facilitate quick record lookup and structured reporting.

Data Structures & Algorithm Suite

C Language

- Built foundational data structures (linked lists, stacks, queues, and binary search trees) from scratch in C with strict dynamic memory management.
- Benchmarked time and space complexity across various sorting and searching algorithms to optimize performance.
